Office Action Summary

Application No.

09/768,732

Applicant(s)

Wang et al.

Examiner

Cao (Kevin) Nguyen

Art Unit

2173

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Oct 14, 2003
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-26 is/are pending in the application.
- 4a) Of the above, claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claims _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
*See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). _____ 6) ☐ Other:

Art Unit: 2173

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jamtgaard et al. (US Patent No. 6,430,624 B1) in view of Scott et al. (US Patent No. 5,675,752).

Art Unit: 2173

Regarding claim 1, Scott discloses an apparatus for the generation and application of a set of rules to transform source content into result content for a content receiving device, the apparatus comprising a source content area for retrieving the source content (see col.8, lines 17-59) ; an analyzer for identifying separate elements within the source content and assigning an identifier to each element; a result content area providing selective placement of the elements according to a desired layout (see col. 11, lines 5-63); and an application device for applying the transformation rules to the source content that is requested by the content receiving device (see col. 13, lines 5-47). However, Scott fails to explicitly teach a rule generator for generating a set of transformation rules for transforming the source content into the result content according to their selective placement.

Jamtgaard teaches a rule generator for generating a set of transformation rules for transforming the source content into the result content according to their selective placement (see col. 4, lines 34-67 and col. 5, lines 27-67). It would have been obvious to one of an ordinary skill in the art at the time the invention was made to provide a rule generator for generating a set of transformation rules for transforming the source content into the result content according to their selective placement as taught by Jamtgaard to the interactive presentation environment of Scott; in order to provide the screen template editor contains a screen template editor graphical user interface (GUI) that displays a plurality of tool dialog boxes on an output display to permit a user to select the generic screen template elements. .

Art Unit: 2173

Regarding claim 2, Scott discloses wherein the source content area and result content area are part of a graphical editing tool (see col. 14, lines 10-54).

Regarding claim 3, Scott discloses wherein editing tools provide for graphical placement of source content from the source content area into the result content area as result content (see col. 18, lines 15-55).

Regarding claim 4, Jamtgaard discloses wherein a storage device is used to store the transformation rules for access by the application device. (see col. 5, lines 27-67).

Regarding claims 5 and 6, Jamtgaard discloses wherein the server device is a proxy server device that receives a request for source content, retrieves the source content from a corresponding web server device, and transforms the source content to result content according to the transformation rules (see col. 7, lines 13-67 and col. 8, lines 1-54).

Regarding claims 7 and 8, Jamtgaard discloses wherein the graphical editing tool is running on a design station device; and wherein the design station device is in communication with the application device in order to provide the transformation rules (see col. 13, lines 19-50).

Regarding claim 9, Scott discloses wherein the source content and result content includes web page information, and the content receiving device is a web enabled device (see col. 19, lines 1-59).

Claim 10 differs from claim 1 in that "a web page editor running on the at least one design station, whereby a source web page is retrieved and the layout of a result web page is

Art Unit: 2173

formed according to the different device capabilities; and a rule generator associated with the web page editor for generating a set of transform rules to convert the source page to the result page, the transform rules being communicated to the at least one proxy server device, wherein the web enabled devices request information from the at least one web site through the at least one proxy server which applies the transform rules to the requested information” which read on Jamtgaard (see col. 14, lines 4-67 and figures 2-3).

As claims 11-13 are analyzed as previously discussed with respect to claims 5-10 above.

Claim 14 differs from claims 1 and 10 in that “a first display area for displaying the source content; a second display area for displaying the result content, a set of graphical tools whereby the source content can be graphically moved with the tools from the first area to the second area to form a result layout” which read on Scott (see col. 21, lines 10-67 and col. 22, lines 16-56).

As claims 15-18 are analyzed as previously discussed with respect to claims 5-10 and 14 above.

Regarding claims 19-21, Jamtgaard discloses wherein the communication includes a network link; and wherein the network link includes the Internet; and wherein the communication includes a wireless link (see figures 2-5).

Claim 22 differs from claims 1, 10 and 14 in that “arranging result information content from the source information content according to the capabilities of the receiving device;

Art Unit: 2173

generating transformation rules according to the transformation between the source information content and the result information content; and applying the appropriate transformation rules to the source information content when the content is requested by the receiving device.” which read on Jamtgaard (see figures 4-6).

As claims 23-26 are analyzed as previously discussed with respect to claims 5-10, 14 and 22 above.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (PTO-892).

Response

4. Responses to this action should be mailed to: Commissioner of Patents and Trademarks, Washington, D.C. 20231. If applicant desires to fax a response, (703) 308-6306 may be used for formal communications.

Please label “PROPOSED” or “DRAFT” for informal facsimile communications. For after final responses, please label “AFTER FINAL” or “EXPEDITED PROCEDURE” on the document.

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington, VA. Sixth Floor (Receptionist).

Art Unit: 2173

Inquires

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cao (Kevin) Nguyen whose telephone number is (703) 305-3972. The examiner can normally be reached on Monday-Friday from 8:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Cabeca, can be reached on (703) 308-3116. The fax number for this group is (703) 746-7240.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-3900.
